# PUBLIC PRIVATE MIX FOR TB CONTROL

Yogyakarta, July 14-22 2010  
Application deadline: May 15, 2010

## Background

In many high burden countries, patients with TB symptoms seek care from diverse care providers, outside the current scope of the National Tuberculosis control Programme (NTP). Non-NTP providers usually do not apply efficient diagnosis strategies nor do they follow the DOTS strategy, thus hampers case detection, delays diagnosis, results in sub-standard treatment, increases risk for drug resistance and/or puts an excessive financial burden on patients. WHO recommends in the new Stop TB Strategy to engage non-NTP providers and scale up Public-Private Mix (PPM) DOTS initiatives. Thus, there is an impending need to strengthen the capacity to plan, implement and evaluate PPM DOTS initiatives in high-burden countries.

## Target Participant:

National and provincial level managers of TB control programme in Asian countries.

## Course Objectives:

By the end of the training participants are able to:

- Carry out a national situation assessment for public-private mix in TB control
- Plan evaluation of the implementation of public-private mix in TB control

## Course Modules:

- Module I: National Situation Assessment
  - TB Epidemiology
  - Health Service Utilization
  - The National TB Control Program (NTP)
  - The Non-NTP Provider
  - Policy and Regulation
- Module II: PPM Strategies
  - Involving Private Practitioners
  - Involving prisons
  - Involving NGOs/businesses
  - Involving Hospitals

Location: Yogyakarta, Indonesia

Language: English

## Where will this course be organized ?

The Special Region of Yogyakarta, one of the smallest provinces in Indonesia, has been widely known as a center of Javanese culture as well as a center of learning. Its designation as a center of learning is marked by the existence of 120 state and private tertiary educational institutions, with a student population of over 300,000. Yogyakarta is a city with outstanding historical and cultural heritage with numerous thousand-year-old temples as inheritance of the great ancient kingdom, such as Borobudur temple. Besides the cultural heritage, Yogyakarta has beautiful natural panorama. These major attractions are situated on Yogyakarta's doorstep, comfortably accessible by day tours.

## TBCTA Regional Training Centre (ReTraC) Asia

The Faculty of Medicine Universitas Gadjah Mada (FM UGM) is an internationally top-ranked academic institution in medicine and health sciences with considerable expertise and experience in training, research and consulting in TB control. Following a request of applications in May, 2007, FM UGM in Yogyakarta, Indonesia has been selected as regional training centre for TB control in Asia by the The Tuberculosis Coalition for Technical Assistance (TBCTA) - a coalition of the major international organizations in TB control. The aim of this TBCTA Regional Training Centre (ReTraC) Asia is to deliver high-quality trainings in support of national, regional and global plan to stop TB 2006-2015. The target group for these trainings are middle level managers and upper level managers.

### Course details:

**Duration: 9 days (July 14 to 22, 2010)**

**Location: Yogyakarta, Indonesia**

**Language: English**
